EDUCATION

•Bachelor of Engineering in Computer Engineering

2024-28

Bharati Vidyapeeth College of Engineering, Navi Mumbai

PROJECTS

•BountyBoard | Decentralized Escrow Platform

Solidity, Hardhat, React, Ethers.js

- Building a decentralized platform where clients can post work and lock payments in a smart contract.
- Implemented escrow logic to securely hold ETH until the work is completed and approved by the client.
- Built and tested smart contract functions using Solidity and Hardhat, with React and Ethers.js for the frontend.

•Full-Stack ATS Platform

React, Node.js, Express.js, MongoDB

- Building a full-stack Applicant Tracking System to manage job applications and recruitment workflows.
- Developed applicant profiles, job applications, authentication, backend APIs, and database integration.
- Designed responsive interfaces and connected frontend, backend, and database for an end-to-end workflow.

•Complaint Management System | Winner - BV Hacks 1.0

JavaScript, Firebase, HTML, CSS

- Developed a web-based system to submit, track, and manage complaints through an interactive dashboard.
- Implemented complaint status tracking, priority management, complaint history, and dashboard analytics.
- Built during Bharati Vidyapeeth's BV Hacks 1.0 8-hour hackathon and secured 1st Place.

POSITION OF RESPONSIBILITY

•Technical Team Member WeCodeCrunchers (WCC)

Feb 2025 - Feb 2026

- Contributed in building website of WCC
- Part of organizing team in various workshop conducted by WCC.

TECHNICAL SKILLS AND INTERESTS

Languages: C, C++, JavaScript, HTML, CSS

Frameworks: React.js, Node.js, Express.js, Tailwind CSS

Databases: MongoDB, Firebase

Tools: Git, GitHub, VS Code, Figma, Postman

Areas of Interest: Full Stack Development, Web Development, UI/UX

Soft Skills: Problem Solving, Teamwork, Communication

EXPERIENCE

•Freelance Video Editor

Aug 2024 - Present

Self-employed

- Edited video content for YouTube, Instagram, and promotional material for clients in Entrepreneurship Speaker, Education, Food
- Worked with tools like DaVinci Resolve, Gimp, Canva
- Added music, transitions, subtitles, and effects to enhance storytelling and viewer engagement.
- Managed projects end-to-end: from raw footage to final export, meeting tight deadlines.

ACHIEVEMENT

- **Winner BV Hacks 1.0** - 8 hour Coding Hackathon
